GENERAL INFORMATION

Welcome back to Term 3

Dear Parents and Carers,

Now that we are halfway through the year, we want students to gain increased independence, especially in regards to routines, procedures and looking after their own belongings. To assist in their progress, home routines are important, such as allowing them to pack their bags in the morning or the night before and be responsible for their belongings.

Classroom Teacher Communication

- **Email** remains the best way to communicate with your child's teacher about school. They should be the first person you speak to if you have any questions or concerns. As teachers are in class for most of the day and often have meetings before and after school time, please allow **2 business days** to receive a response.
- **Call the school office** if you have a message that is **urgent** and they will ensure your child's teacher receives the message.
- **Set up a meeting** via email if you would like to **speak in person** with your child's classroom teacher. We are more than happy to meet at a mutually convenient time!

HOMEWORK

This term, students will continue bringing home a **new home reader every day** to read with an adult. Your child should be able to read many of the words automatically or blend the sounds together to read unfamiliar words. The focus this term will be on fluency, intonation and expression.

New **sounds and letters** will continue to be taught explicitly each week. In Weeks 3, 5 and 8, these letters will be sent home for your child to revise. You could create flash cards or memory games with these letters. Students should practise the sound of the letter, naming the letter, writing the letter and can begin creating short words.

Tricky words will continue to be taught throughout Term 3 and should be revised at home regularly so that they can be recognised immediately. These tricky words are listed at the back of the Home Reading Diary, and the teacher will indicate when your child is ready to begin revising them. Reading these words regularly is important for retention.

MathSeeds and **Fast Phonics** is still an optional homework task, for no more than 30 minutes a week. The yellow homework folder should be brought to school every day so that your child can get a new home reader. If you would like to read a book over 2 days, or read it on a second day to consolidate, you are welcome to keep the same reader over multiple days. Homework is collected on Thursdays and returned on Fridays. This provides you with the opportunity to complete homework over the weekend if you choose.

Information is listed below about the learning experiences your child will be involved in this term.

ENGLISH	
Phonics	The following sounds will be taught throughout Term 3: w, ck, ll, ff, ss, sh, qu, ee, z, zz, ch, v, y, x, wh, th, oo, ng, ay . These sounds will be sent home after they are introduced in class. Please spend time playing games such as 'I spy' and identifying these sounds in their environment, e.g. chair starts with /ch.
Talking Time	Talking Time with allocated topics will begin in Week 2 (starting July 29). Students are asked to speak for 1 minute, elaborating on the topic by thinking about who, what, where, when, why and how. Please refer to the ' Homework Overview ' for your child's Talking Time day and the topic schedule.
Writing	The textual concepts covered in our English units are imagery, perspective, context and narrative. Students will engage in these concepts as they listen to and discuss quality literature and respond by creating simple written texts and illustrations. We will be concentrating on forming letters that are the appropriate size as students practice writing on dotted-third lines.

MATHEMATICS	
Concepts	In Mathematics, students will explore how collections of 10 can be useful and learn how to change collections by adding and subtracting. They will describe the position of something and investigate units of measurement through area, volume and mass.
Problem Solving	Students will engage in Number Talks each week to build upon mental strategies and improve their mathematical reasoning and vocabulary.
OTHER KEY LEARNING AREAS	
Science	In Semester 2, we are learning about 'How Things Move'. In this unit, students will learn about the different materials that are used to make everyday objects and complete simple investigations to test the properties of a range of materials. This will also include simple investigations where students will learn the different ways that objects move and the factors that affect this. Students will design their own playground equipment using classroom materials. The National Science Week 2023 theme is <i>Innovation: Powering Future Industries</i> and students will take part in an activity with their Year 4 buddies.
Geography	The Semester 2 unit is called 'People Live in Places'. Students will explore the places they live in and belong to, develop an understanding of what makes a place special and how this may differ for different people. They will learn about the importance of looking after places and explore how the location of places can be represented (e.g. using maps). Students will learn how to use the library to further enhance their mapping skills.
PDHPE	<p>Students will apply the fundamental movement skills taught in Semester 1 to play a variety of modified games and activities with their classroom teacher.</p> <p>Our Personal Development program is called 'Keeping Safe,' where students will explore how to stay safe in different environments. Students will also participate in the Peer Support program run by Year 6 every Friday. They will take part in lessons that focus on building positive relationships and using the schools Positive Behaviour for Learning (PBL) focus.</p>
Creative Arts	This term, Kindergarten will focus on learning about the elements of dance. They will explore different ways to move while keeping time to a piece of music, demonstrating an awareness of space and control. Students will have the chance to appreciate a variety of dances and discuss how it makes them feel.
Technology	Kindergarten will use technology as a way of demonstrating their knowledge and understanding via Seesaw. Students will learn to post to their own learning journal and record or type captions to accompany their work. Students will also take part in their first coding program, where they will solve problems by completing unplugged tasks (offline) and using Scratch Jnr.

Your support is greatly appreciated. Kindergarten teachers wish you and your child a safe, happy and successful
Term 3!

Kind regards,
Kindergarten Teachers
